

Program on Sustainable Lawn Care, Wednesday June 22nd 7:30 p.m.
Winnetka Congregational Church, 725 Pine Street, Winnetka

You are invited to a free program on sustainable lawn care presented by Ruth Kerzee, Director of the Midwest Pesticide Action Center, on Wednesday evening, June 22nd at 7:30 pm. The event will be in the Centennial Room of Winnetka Congregational Church at 725 Pine Street, Winnetka.

Want to learn more about how to accomplish a lovely residential landscape using fewer lawn chemicals and pesticides? Wish you knew how to better communicate with your landscaper to achieve safer play areas for your children and pets?

Ms. Kerzee will offer ideas on how to interface with your professional landscaper; techniques that can be used to reduce lawn chemical use and lawn care costs; and how to encourage bees, butterflies, and other beneficial insects in your yard. She will also highlight why it is important to be mindful of our lawn care practices.

This event is sponsored by the WCC Green Team, and the public is invited. There will be a question and answer session following the presentation.
