Subject: Status of the Stormwater Study Results

Good afternoon:

The purpose of this notice is to provide an update on the stormwater action plan study results. The hydraulic modeling and evaluation of project options is complete and ready to be presented to the community at a Municipal Services Committee meeting. The role of this Village Board Committee is to provide an open and transparent venue for public discussion. Although there are opportunities to meet during the day in December, the Committee feels strongly that a project of this importance should be discussed in the evening so residents that work during the day can participate in the public involvement component of the meeting. Finally, staff and the Committee feel that meeting close to the holidays could decrease participation because personal calendars are filled up with other obligations. For these reasons, the Municipal Services Committee will have the meeting to discuss the stormwater study results in January, 2015. We apologize for the delay, but hope you understand these circumstances.

Wishing you all a Happy Thanksgiving!

You are receiving this email because you previously expressed an interest in sewer issues in Wilmette. If you would like to be removed from the address list, please let me know.

Best regards,
Brigitte
