Approximate date first implemented: 2008 Frequency of each BMP program: Once annually at minimum

Qualifying Local Programs

The Metropolitan Water Reclamation District of Greater Chicago website has information designed to educate the public on stormwater and pollution issues. The Go Green Wilmette organization also has a strong public education and outreach program within the Village. The Village will continue to support these organizations.

✓ A.1 Distributed Paper Material

Brief Description of BMP

The Water/Sewer Division of the Engineering & Public Works Department periodically publishes stormwater educational articles in the resident newsletter. Updated information is also maintained on the Village website. The articles will have tips for homeowners and businesses to take in order to reduce the number of pollutants that are discharged into our waterways.

Measurable Goals, including frequencies

Publish articles in the quarterly resident newsletter, The Communicator, and maintain updated information on the website.

Milestones

- Year 1: Maintain current program.
- Year 2: Maintain current program.
- Year 3: Maintain current program.
- Year 4: Maintain current program.
- Year 5: Maintain current program.

Additional Info

BMP Number: A.1

Brief Description of BMP: The Finance Department inserts stormwater protection guidelines into the contractor and business license renewal application forms, which are mailed at least thirty days prior to the end of each calendar year, per Village Code. The inserts provide tips on ways to reduce stormwater pollution.

Measurable Goal(s), including frequencies: Continue to mail guides to contractors and business owners annually, or as needed.

BMP Number: A.1

Brief Description of BMP: The Forestry Division of Public Works educates stakeholders about the Village's Tree Protection and Tree Canopy Ordinances through the grading permit process. Residents are provided with information about the pruning, removal, planting, disease control and care for sick and damaged trees on public property. Continue to offer the Cooperative Tree Planting program for residents (budget dependent).

Measurable Goal(s), including frequencies: Maintain the Village Code and tree inspection program on the website (updated as needed), and provide educational information to residents and/or contractors during the grading permit process.

Measurable Goals (include shared responsibilities)

BM	PΝ	Jum	ber:	A 1

Brief Description of BMP: The Village Manager's Office provides a New Resident Handbook and Citizen Contact/ Service Request Information. The Resident Handbook contains information regarding the Solid Waste Program, permits, tree planting, and includes contact information for each department. The Village's website contains the electronic version of the Resident Handbook, stormwater management information, and an electronic "Service Request" option.

Measurable Goal(s), including frequencies: The Village Manager's Office will review the Resident Handbook at least once annually and update as needed. The Finance Department will distribute the updated Resident Handbooks and refer residents to the Village's website.

A.2 Speaking Engagement

Brief Description of BMP

Solid and Hazardous Waste Program – The Deputy Director of Public Works and Assistant to the Director of Engineering & Public Works have prepared a brochure highlighting the various refuse, recycling and yard waste programs in the area. Chapter 22 (formerly Chapter 7) of the Village Code addresses the collection of refuse, recycling and yard waste. The Village is a member of the Solid Waste Agency of Northern Cook County (SWANCC), a nonprofit intergovernmental agency that provides solid waste management services, programs and resource materials to its member communities. The Village takes advantage of SWANCC services to coordinate and publicize such events, including solid waste and hazardous waste. The Village announces these public service programs to residents through the Village newsletter, website, E-news and brochures.

Measurable Goals, including frequencies

Communicate information to residents via the quarterly Village Newsletter, The Communicator, website, CTV6, weekly E-news, New Resident Handbook, and/or brochures.

Milestones

Year 1: Maintain current program.

Year 2: Maintain current program.

Year 3: Maintain current program.

Year 4: Maintain current program.

Year 5: Maintain current program.

Additional Info

BMP Number: A.3

Brief Description of BMP: Rain Barrel Program – The Village promotes the Metropolitan Water Reclamation District (MWRD) rain barrel program, which offers Cook County residents discounted rates on rain barrels.

Measurable Goal(s), including frequencies: Continue to promote the MWRD's rain barrel program to residents.

A.4 Community Event

Brief Description of BMP

The Village of Wilmette co-sponsors the annual Go Green Wilmette environmental fair called "Going Green Matters", which is held each March.

Measurable Goals, including frequencies

Continue to sponsor and facilitate the Going Green Matters event each year.

Milestones

Year 1: Maintain current program.	
Year 2: Maintain current program.	
Year 3: Maintain current program.	
Year 4: Maintain current program.	
Year 5: Maintain current program.	
Additional Info	
BMP Number: A.4	
Brief Description of BMP: The Village co-sponsors an annual Document Destruction event and hosts an annual drop-off for holiday light recycling. The Village publicizes these programs and events in the resident newsletter, website, e-news, and/or cable TV to increase participation in these recycling programs.	
Measurable Goal(s), including frequencies: Continue to publicize and facilitate recycling events each year.	
✓A.5 Classroom Education Material	
Brief Description of BMP	
Fire Department Handouts on Safety and Environmental Issues – The Fire Department educates grammar and middl school students on the importance of fire safety and environmental issues with handout pamphlets. Educating childre at school is an effective way to pass environmental awareness to their parents and throughout the entire community.	
Measurable Goals, including frequencies	
Hand out pamphlets once a year to students.	
Milestones	
Year 1: Maintain current program.	
Year 2: Maintain current program.	
Year 3: Maintain current program.	
Year 4: Maintain current program.	
Year 5: Maintain current program.

Brief Description of BMP

The Village storm sewer system discharges into the Skokie River (HCCD-09), the North Branch of the Chicago River (HCC-04) and the North Shore Channel (HCCA-02). According to the 2016 303d report, the Skokie River is impaired due to Fecal Coliform, sedimentation, Phosphorus, Dissolved Oxygen, Chloride, Chlordane and Bottom Deposits, The North Branch of the Chicago River is impaired due to Barium, Cadmium, Chromium, Copper, DDT, Endrin, Hexachlorobenzene, Lead, Mercury, Nickel, Phosphorus, Sedimentation, Silver, Total Suspended Solids, Chloride, Fecal Coliform, Dissolved Oxygen and Temperature. The North Shore Channel is impaired due to Fecal Coliform. Mercury, Dissolved Oxygen, pH, Phosphorus and Polychlorinated biphenyls. The North Branch Chicago River Watershed Total Maximum Daily Load (TMDL) Report for fecal coliform, chloride, and total phosphorus was approved by the U.S. Environmental Protection Agency on April 13, 2020.

Measurable Goals, including frequencies

Continue to participate in and support the North Branch Chicago River Watershed Workgroup (NBWW), which is working towards developing a list of high-priority watershed improvement projects based on the action plan recommendations from the North Branch Chicago River Watershed-Based Plan

recom	heridations from the North Branch Chicago River vivatershed-based Plan.

Brief Description of BMP

Stakeholder Comments on Permits – The Engineering Department staff conducts professional reviews and incorporates pertinent comments received from stakeholders as appropriate. Stakeholder comments are solicited via a grading notice which is part of the grading permit process. Any comments during meetings of the Zoning Board of Appeals, Plan Commission, Appearance Review Commission and/or Village Board may be incorporated to strengthen the Village review process.

E. Post-Construction Runoff Control

Approximate date first implemented: 2008

Frequency of each BMP program: Once annually at minimum

Qualifying Local Programs

The Village is an authorized community with respect to the Cook County Watershed Management Ordinance and issues Watershed Management Permits for developments within the separate storm sewer areas of the Village. The Technical Guidance Manual associated with the Watershed Management Ordinance (WMO) has technical information on a wide variety of BMPs that can be incorporated into site design.

Measurable Goals (include shared responsibilities)

∇ E.1 Community Control Strategy

Brief Description of BMP

Tree Preservation Ordinance – During the post-construction phase, continue to enforce the Tree Protection and Tree Canopy Preservation Ordinances. Trees intercept water and reduce storm runoff and the possibility of flooding.

Measurable Goals, including frequencies

Continue to enforce the Tree Protection and Tree Canopy Preservation Ordinances during the permit review process and throughout construction.

Milestones

Year 1: Maintain current program.

Year 2: Maintain current program.

Year 3: Maintain current program.

Year 4: Maintain current program.

Year 5: Maintain current program.

Additional Info

BMP Number: E.1

Brief Description of BMP: Technical Guidance and Education of Stakeholders – The Village was an active participant in the development of the Technical Guidance Manual for the Watershed Management Ordinance (WMO) and provides information to stakeholders, developers and contractors on new regulations and procedures when they apply for a permit. The information is available on the Village website and at the Village Hall as a pamphlet.

Measurable Goal(s), including frequencies: Provide instructions to stakeholders, developers, engineers and contractors on new regulations and procedures required by the WMO and Village regulations via pamphlets and the Village website

BMP Number: E.1

Brief Description of BMP: Coal Tar Sealant Ban – The Village prohibits the sale and use of coal tar sealants to seal cracks in pavement. Coal tar sealants contain toxic chemicals and carcinogens that have the potential to enter our waterways via stormwater runoff.

Measurable Goal(s), including frequencies: Continue to enforce the Coal Tar Sealant Ban.

▼ E.2 Regulatory Control Program

Brief Description of BMP

Post-Construction Site Stormwater Runoff Controls – The Grading Ordinance and Watershed Management Ordinance provides requirements for stormwater management. Both require a stormwater management plan and BMPs. The Village provides education to stakeholders, developers and contractors on the requirements and importance of stormwater controls during construction. This also includes Chapter 8, Article XXIX (formerly Chapter 9) of the Village Code to address buffer zones next to Lake Michigan to reduce erosion and deposition into the lake.

Continue to review runoff controls and inspect construction sites to ensure compliance with the Grading Ordinance and Watershed Management Ordinance. Milestones Year 1: Maintain current program. Year 2: Maintain current program. Year 3: Maintain current program. Year 4: Maintain current program. Year 5: Maintain current program. staff, professional engineers or state certified plumbing inspectors as necessary and completed before, during and after construction. The inspections verify proper BMPs are installed during the construction process and is being performed in

accordance with plumbing standards (i.e. no cross-connections). The Village uses an outside contractor to help

Measurable Goals (include shared responsibilities)		
Year 5: Maintain current program.		
Additional Info		
BMP Number:		
F.2 Inspection and Maintenance Program		
Brief Description of BMP		
Storm Sewer Televising/Cleaning – Continue to inspect and clean approximately 10% of the mainline storm sewer system annually.		
Measurable Goals, including frequencies		
Continue existing annual inspection and cleaning program.		
Milestones		
Year 1: Maintain current program.		
Year 2: Maintain current program.		
Year 3: Maintain current program.		
Year 4: Maintain current program.		
Year 5: Maintain current program.		
Additional Info		
BMP Number: F.2		
Brief Description of BMP: Detention Pond Inspection and Maintenance – Continue existing practice of inspecting the detention pond after every rain event. Clean and repair the detention pond restrictor as needed. The Detention Pond is located on the east side of the Public Works facility at 711 Laramie Avenue, Wilmette, IL. Measurable Goal(s), including frequencies: Maintain current annual inspection and maintenance practices.		
BMP Number: F.2		
Brief Description of BMP: Outfall Structures Inspection and Repair – Continue existing practice of inspecting outfall structures after 2 inches of rainfall. Schedule inspections and cleaning every 3 years for preventive control measures.		
Measurable Goal(s), including frequencies: Continue existing inspection program.		
BMP Number: F.2		
Brief Description of BMP: Catch Basin/Inlet Cleaning – Continue existing program of cleaning catch basins and inlets on a 5-year cycle. This practice will serve as a preventative control measure to eliminate any potential debris from blocking the storm sewer drains.		
Measurable Goal(s), including frequencies: Continue existing annual monitoring and cleaning program.		
✓ F.3 Municipal Operations Storm Water Control		

Notice of Intent for New or Renewal of General Permit for Discharges from Small Municipal Separate Storm Sewer Systems (MS4's)

The Village has procedures in place to eliminate or reduce discharge of pollutants from municipal operations, including a covered salt storage area, proper storage of spoil materials, and placement of inlet protection in the maintenance yard.

Brief Description of BMP

Measurable Goals, including frequencies			
Continue existing materials management program.			
Milestor	Milestones		
Year 1:	Maintain current program.		
Year 2:	Maintain current program.		
Year 3:	Maintain current program.		
Year 4:	Maintain current program.		
Year 5:	Maintain current program.		
Addition			
BIVII	P Number: F.3		
Brief Description of BMP: Controlled Application of Pesticides and Herbicides - Continue existing program of using only licensed applicators and operators from the Illinois Department of Agriculture. Continue the practice of using minimal applications of organic fertilizers and pesticides at Village facilities. Continue the practice of having minimal fertilizer and organic pesticides applied in Village rights of way, only as needed. Fertilizer and pesticide storage is done to minimize potential for pollution of runoff.			
- 1	asurable Goal(s), including frequencies: Continue existing controlled application of pesticides and herbicides gram.		
BM	P Number: F.3		
Brief Description of BMP: Re-Vegetation and Maintenance of Natural Areas – The Public Works Street and Forestry Divisions plant natural vegetation in areas appropriate for this practice. Natural vegetation reduces the need for pesticides and herbicides, and intercepts stormwater runoff. Natural areas are maintained by regular mowing, weed control, organic fertilization, irrigation and maintenance using good housekeeping practices. This practice will help reduce runoff and minimize debris from entering into the storm systems. Measurable Goal(s), including frequencies: Continue existing re-vegetation and maintenance program.			
F.4 Municipal Operations Waste Disposal			
Brief De	escription of BMP		
Waste E monthly which e filters ar	Disposal Program – The Village completes street sweeping in business streets weekly and residential streets (weather dependent). Spoil bins are located at Public Works with drains that connect to the sanitary system, liminate waste from entering the storm sewer system. The vehicle wash facility is entirely self-contained as it not recycles the wash water with any overflow discharging to the sanitary system. The Village also recycles used if and filter products.		
Measurable Goals, including frequencies			
	e proper disposal of waste.		
Milestones			
Year 1:	Maintain current program.		
Year 2:	Maintain current program.		
Year 3: Maintain current program.			

Year 4: Maintain current program.

Year 5: Maintain current program.

Additional Info		
BMP Number:		
Brief Description of BMP		
The Village has floodplain management regulations and has completed an assessment of the separate stormwater		
system and continues to evaluate flood reduction BMPs that incorporate pollutant reduction techniques including rain gardens.		
Measurable Goals, including frequencies		
Continue to assess flood reduction measures within the separate storm sewer system.		
Milestones		
Year 1: Maintain current program.		
Year 2: Maintain current program.		
Year 3: Maintain current program.		
Year 4: Maintain current program.		
Year 5: Maintain current program.		
Additional Info		
BMP Number:		
F.6 Other Municipal Operations Controls		
Brief Description of BMP		
Monitoring and Assessment Program – The Village will perform yearly visual monitoring of the receiving waters to help assess the BMPs in their ILR40 permit. Where possible, the Village will utilize monitoring data collected by MWRD or IEPA.		
Measurable Goals, including frequencies		
Yearly visual monitoring and annual assessment of BMPs.		
Milestones		
Year 1: Maintain current program.		
Year 2: Maintain current program.		
Year 3: Maintain current program.		
Year 4: Maintain current program.		
Year 5: Maintain current program.

Sediment Monitoring

s sediment monitoring currently taking place?		○No
---	--	-----

If Yes, please describe the sediment sampling program.

Water quality and sediment sampling are conducted for Wilmette by the North Shore Water Reclamation District, working under the management of the North Branch Watershed Workgroup (NBWW), of which Wilmette is a member. Water column and sediment sampling, sediment chemistry, continuous DO monitoring, benthic periphyton sampling and two additional nutrient water chemistry sample events are completed on a two-year rotating basis concurrent with the NBWW's bioassessment program. The full 2-year Monitoring Strategy (Illinois EPA Approved April 2019) can be found here: https://www.nbwwil.org/wp-content/uploads/2019/04/NBCR-Watershed-Monitoring-Strategy FINAL.pdf

Sample Monitoring of Outfalls
