Wilmette (Village of) IL

Update to credit analysis

Summary

[Wilmette, IL](#)'s (Aaa stable) credit profile benefits from very high resident incomes that far exceed the median for the rating category and broad legal flexibility to raise local taxes and fees to address rising expenditure pressures given its status as a home rule local government. The village is a mature [Chicago](#) (Ba1 stable) suburb. Financial operations are sound and fund balance and liquidity are expected to remain healthy. The village's main credit challenge is its above average pension burden.

We regard the coronavirus outbreak as a social risk under our ESG framework, given the substantial implications for public health and safety. We do not see any material immediate credit risks for Wilmette. However, the situation surrounding coronavirus is rapidly evolving and the longer term impact will depend on both the severity and duration of the crisis. If our view of the credit quality of Wilmette changes, we will update our opinion at that time.

Credit strengths

- » Very affluent suburban community with economic ties to Chicago metro area
- » Significant legal authority to raise local revenue as a home-rule village
- » Healthy operating reserves relative to budget

Credit challenges

- » Very high pension burden
- » Exposure to economically sensitive sales and income taxes

Rating outlook

The stable outlook reflects the expectation that the village's financial position will remain sound given strong budgetary management and that pressure from growing pension contributions will be modest given the village's affluent tax base and ability to raise local revenue to support high pension contributions.

Factors that could lead to an upgrade

- » Not applicable

Factors that could lead to a downgrade

- » Further growth in pension or debt burdens

» Reduction in operating reserves or available liquidity

Profile

Wilmette is located in [Cook County](#) (A2 stable) approximately 16 miles north of downtown [Chicago](#) (Ba1 stable). The village provides public safety (police and fire), water service (supply, treatment and distribution), sewer service (distribution only) and general governmental services to approximately 27,000 residents.

Detailed credit considerations

Economy and tax base: affluent Chicago suburban tax base

The coronavirus is driving an unprecedented economic slowdown. We currently forecast US GDP to decline significantly during 2020 with a gradual recovery commencing toward the end of the year. Local governments with the highest exposure to tourism, hospitality, healthcare, retail and oil and gas could suffer particularly severe impacts. Wilmette is a mature residential suburb of Chicago that is not materially reliant on the aforementioned sectors. The village's unemployment is comparatively low at 10% as of April 2020, which is below the national rate (14%) and Illinois's rate (17%).

Wilmette derives tax base and economic stability from its very strong socioeconomic profile. The village is very closely linked to the diverse Chicago economy, with residents having direct transportation access to the Chicago's downtown and high income jobs via the regional commuter rail. Median family income in the village is a very high 258% of the national figure and far exceeds the median of 183% for the Aaa rating category.

Wilmette's capacity to tap its local wealth for revenue is strong, given its unlimited authority to raise local property and sales taxes. While tax base valuations are volatile in Cook County, fluctuations do not have an impact on the village's property tax receipts, given

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the ratings tab on the issuer/entity page on www.moody's.com for the most updated credit rating action information and rating history.

the village sets its annual levy on a dollar basis and is not subject to any taxing limitations. The village's full valuation is currently \$6.3 billion.

Financial operations and reserves: sound financial operations support healthy reserves

We expect the village's financial position will remain sound given moderate revenue loss from slowed economic activity, healthy reserves, and strong budgetary management. The village is currently expecting revenue loss from the response from the coronavirus outbreak to be approximately \$3 million (8% of fiscal 2020 budgeted revenue). Cost saving measures of approximately \$400,000 have been identified and will offset a portion of the revenue loss but general fund reserves will cover the remaining shortfall. Based on these figures, the cash basis general fund balance for fiscal 2020 (fiscal year ends 12/31) is projected to end at approximately \$11 million or a still sound 32% of budgeted operating expenses and above the village's fund balance policy of 30% of operating expenditures.

In fiscal 2019, the village posted a \$2 million general fund surplus from stronger than budgeted permit revenue, increasing available general fund balance to \$14 million, 36% of general fund revenue. Available operating fund balance stood at \$14.7 million across the village's major operating funds (general, debt service and motor tax fuel funds), or 35% of operating fund revenue at the close of fiscal 2019. Nearly all of this fund balance was in the general fund rather than the debt service fund, indicating a high degree of reserve flexibility.

Wilmette's general fund revenues are relatively diverse as they include property taxes (30% of budgeted revenue), sales taxes (16%), charges for services (9%) and state income tax distributions (9%). Consistent with a primary residential tax base, the village does not have a significant dependence on any single business for sales tax receipts. The village does not have any car dealerships or large retailers.

The village has two major enterprise funds to account for water and sewer service. Both funds posted operating surpluses and ended fiscal 2019 with a solid financial position. In addition to serving village residents, the water system is a wholesale supplier of water to the villages of [Glenview](#) (Aaa stable), [Kenilworth](#) (Aaa stable), and Golf. In fiscal 2020, the village will add North Main Utilities as a wholesale customer, which is expected to generate additional net wholesale revenue of \$1 million annually. The village annually budgets a transfer of approximately \$1 million from its water fund to its general fund to support governmental operations.

LIQUIDITY

The village closed fiscal 2019 with net cash and investments across its general, debt service, and motor fuel tax funds of \$11.7 million, or 26% of operating revenue. Across all governmental funds, the village reported net cash and investments of \$13.6 million or 31% of operating revenue.

The village's water and sewer funds each held \$2.1 million, or 155 days and 437 days of O&M expenses, respectively, at the close of fiscal 2019.

Debt, pension and OPEB: high pension burden; moderate debt burden heavily supported by enterprise funds

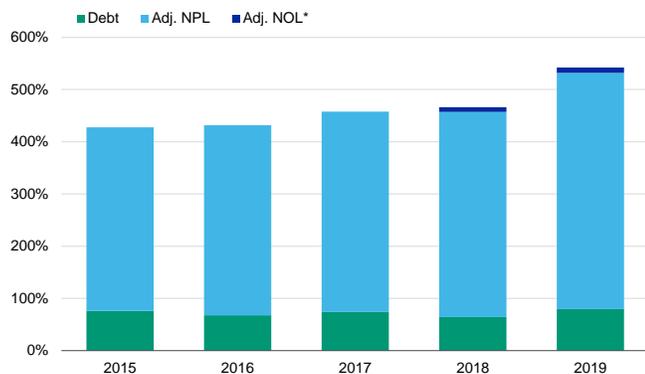

We expect the Wilmette debt burden will increase over the next few years as it plans to issue up to \$40 million in GO bonds to finance a stormwater utility. Inclusive of the Series 2020 bonds, the village has \$92 million of GO bonds outstanding, but its water and sewer enterprises are currently repaying \$56 million of the outstanding GO bonds from annual net revenue. Net of the enterprise-supported debt, the village's debt burden is low compared to full value (0.6% of full value) but more moderate when compared to operating revenue (0.8x fiscal 2019 operating revenue). The village expects to issue up to \$40 million in additional GO bonds over the next five years to finance a stormwater utility to address flooding in certain areas of the village. The GO stormwater bonds will be supported by a new stormwater fee on residential and nonresidential properties that will be included in the monthly utility service (water, sewer and refuse) bills. Debt service expense totaled \$3.7 million, or 8% of fiscal 2019 operating revenue.

The village's pension burden is high and represents a significant share of the village's leverage (See Exhibit 2). Moody's adjusted net pension liability (ANPL), based on a 3.2% discount rate, was \$180 million or a high 2.9% of full value and 4.0x fiscal 2019 operating revenue. In comparison, the village's net pension liability, based on a 7.25% discount rate, was \$57 million in fiscal 2019. The village's total pension contribution was \$6.1 million, or 14% of fiscal 2019 operating revenue.

While the village's pension burden is high, its OPEB burden is modest. Moody's adjusted net OPEB liability (adjusted NOL), based on a 3.2% discount rate, totaled a modest \$4.6 million as of fiscal 2019 or 0.1x fiscal 2019 operating revenue.

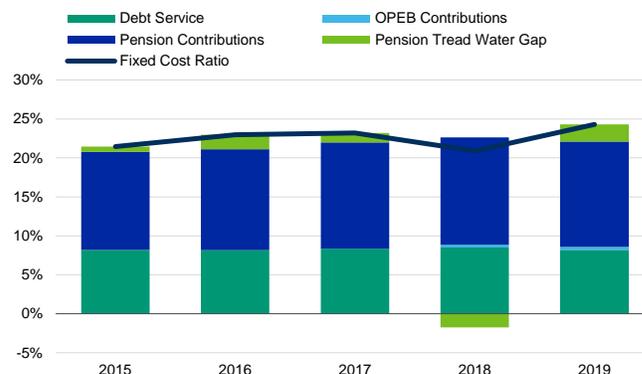

Fixed costs, inclusive of debt service, pension and OPEB contributions, totaled \$9.9 million, consuming 22% of fiscal 2019 operating revenue.

Exhibit 2
Pension burden is primary driver of balance sheet leverage

Exhibit 3
Pension contributions are the largest component of fixed costs

Source: Village's financial statements

DEBT STRUCTURE

All of the village's debt is fixed rate and an average 50% of post-sale principal is scheduled to be repaid within 10 years. The village's outstanding GOULT is secured by the village's full faith and credit pledge and authorization to levy ad valorem taxes unlimited as to rate and amount.

DEBT-RELATED DERIVATIVES

The village is not party to any debt-related derivative agreements.

PENSIONS AND OPEB

Village employees participate in one of two single-employer defined benefit pension plans (police and fire) or the Illinois Municipal Retirement Fund (IMRF), a defined benefit, multi-employer agent plan. The public safety plans are the primary driver of the village's pension burden accounting for nearly 80% of the village's ANPL. In fiscal 2019, the village contributed \$5.1 million (11% of operating fund revenue) in fiscal 2019, which was 90% of the amount that is sufficient to fully cover annual interest accruals on accumulated unfunded liabilities. The tread water¹ shortfall across both plans was \$700,000 (1.5% of operating fund revenue), indicating a modest structural gap. However, this gap is based on the plans' own actuarial assumptions, which include an annual investment return of 7.25%. The village recently updated its pension funding policy and shortened the amortization period of the police and fire plans' unfunded liabilities to a rolling 15 year open amortization periods. The change will increase public safety pension contributions by \$1.5 million over the next three years to \$6.6 million by fiscal 2023, which is credit positive. The emergence of a larger structural budget or growing pension burden because of weaker than planned pension contributions by the village, could lead to credit pressure.

ESG considerations

ENVIRONMENTAL

Environmental considerations have a limited impact on the village's credit profile. Data from Moody's affiliate Four Twenty Seven indicate that Cook County has a relatively high exposure to heat stress compared to counties nationally. Rising temperatures could affect the region's agriculture production over the long-term, but we expect near term challenges will be mitigated by the strength and diversity of the local economy.

SOCIAL

Social considerations are material to the village's credit profile. Resident incomes and wealth are very high. Median family income is 258% of the national figure and full value per capital is \$228,079. The village's population has been stable as it is a mature Chicago suburban community.

The coronavirus outbreak is a social risk under our ESG framework, given the substantial implications for public health and safety. The village is working with local, state and federal partners to keep the community informed about the coronavirus. The village maintains a website that informs residents of the latest news about the coronavirus outbreak. Illinois is currently in phase three of the governor's five-phase reopening plan. Though the plan divides the state into four regions, all moved into phase three on May 29.

GOVERNANCE

Wilmette benefits from prudent management practices and strong financial policies. Management recently updated its formal fund policy that calls for a minimum fund balance of 30% of operating expenditures, a level it currently exceeds, and added that any excess to be directed toward infrastructure improvements or public safety pension plans. The village also maintains a 5-year capital improvement plans and has completed a cybersecurity risk assessment and provides cybersecurity awareness training to employees.

Illinois cities have an Institutional Framework score of "A," which is moderate. Revenue-raising ability is moderate overall but varies considerably. Non-home rule entities are subject to tax rate limitations. In addition, total operating tax yield for entities subject to the Property Extension Limitation Law (PTELL) is capped to the lesser of 5% or CPI growth, plus new construction. Home rule entities have much greater legal flexibility than the rest of the sector with substantial revenue-raising authority. Revenue predictability is moderate, with varying dependence on property, sales and state-distributed income taxes. Expenditures are moderately predictable but cities have limited ability to reduce them given strong public sector unions and pension benefits that enjoy strong constitutional protections. Fixed costs are driven mainly by debt service and employer pension contributions. For single employer public safety plans, the State of Illinois requires most entities to make annual pension contributions that cover current benefit accruals, plus an amount designed to achieve a 90% funded ratio by 2040.

Rating methodology and scorecard factors

The [US Local Government General Obligation Debt methodology](#) includes a scorecard, a tool providing a composite score of a local government's credit profile based on the weighted factors we consider most important, universal and measurable, as well as possible notching factors dependent on individual credit strengths and weaknesses. Its purpose is not to determine the final rating, but rather to provide a standard platform from which to analyze and compare local government credits.

Exhibit 4

Rating Factors	Measure	Score
Economy/Tax Base (30%) ^[1]		
Tax Base Size: Full Value (in 000s)	\$6,253,693	Aa

Endnotes

1 Our "tread water" indicator measures the annual government contribution required to prevent reported net pension liabilities from growing, based on reported assumptions. An annual government contribution that treads water equals the sum of employer service cost and interest on the reported net pension liability at the start of the fiscal year. A pension plan that receives an employer contribution equal to tread water will end the year with an unchanged net pension liability relative to the beginning of the year if all plan assumptions hold. Net liabilities may decrease or increase in a given year because of factors other than the contribution amount, such as an investment performance that exceeds or falls short of a plan's assumed rate of return. Still higher contributions will always reduce unfunded liabilities faster, or will allow unfunded liabilities to grow more slowly than lower contributions. The degree to which contributions fall below the "tread water" indicator can help quantify a structural operating imbalance stemming from pensions, even under reported assumptions. A contribution below the "tread water" level in effect suppresses expenditures by leaving an implied interest on net pension liabilities unpaid, akin to borrowing at the assumed rate of return for operations.
