

# NEIGHBORHOOD STORAGE PROJECT PHASE 1A

Following six years of study and an intensive public education campaign, the Wilmette Board of Trustees voted on April 17, 2018 to pursue the Neighborhood Storage Project to address flooding issues for residents who live west of Ridge Rd. Subsequent Village Board meetings have included discussion on refinement and optimization of this project to provide flood reduction benefits to 98% of residents on the west side of Wilmette that are currently vulnerable to flooding.

The Neighborhood Storage Project consists of new underground stormwater storage facilities at several parks on the west side of the Village that will work together with new larger diameter storm sewers on several Village streets to reduce overland flooding. It is estimated that the project will be constructed in 4 phases over the next 3-4 years. Phase 1A is the first phase that is currently scheduled for construction from Fall 2019 to Summer of 2020. Phase 1A consists of large relief storm sewers within residential areas that are currently subject to flooding. The flood reduction benefits of Phase 1A will not be fully realized until the underground stormwater storage is constructed in future phases.

The streets to be completed during Phase 1A consist of:

- Lavergne (Wilmette Ave to Lacrosse Ave)
- Washington (Lavergne Ave to Lamon Ave)
- Lamon Ave (Washington Ave to Lacrosse Ave)
- Orchard Lane (Romona Rd to Redbud Ln)
- Romona Rd (Lake Ave to Blackhawk Rd)
- Blackhawk Rd (Romona Rd to Seminole Rd)

There will also be watermain improvements being constructed on Lake Ave from Skokie Blvd to Hibbard Rd.
